

Congressional Score Card

Following the November 2004 elections a flurry of activity occurred prompting the need to have it updated. Also, several members of Congress contacted us to improve upon their initial evaluations. The updated scorecard reflects:

- * House legislation introduced on FYROM
- * House letter expressing concern about FYROM policy
- * House letter expressing concern about Transportation and Security Administration activities in occupied Cyprus
- * Senate letter expressing concern about FYROM policy
- * Members of Congress who have increased their co-sponsorship of legislation

You can download the updated version of the AHEPA Congressional Scorecard by visiting www.ahepa.org and accessing it from the Quick Menu at the top of the Home page or clicking on the boxed/shaded link down the right-hand side of the home page. It can also be accessed by going directly to <http://www.ahepa.org/chac/index.html>.

Please feel free to contact us with any questions. Also, please take the initiative to contact your member of Congress to thank him or her if he or she scored well. Don't hesitate to request their more active participation if they did not score well.

Thank you.
